Global Beverage Forecasts - Methodology

1. The first stage in creating the forecasts is gathering input from trade interviews undertaken by the Canadean beverage researchers in each local market. This is designed to provide a medium term (1 to 2 year) view of expected volumes from leading manufacturers by main beverage category. 82 markets are researched biannually. In 42 of these, additional quarterly research takes place. As well as providing an ongoing check on volumes the quarterly research also tracks industry confidence levels.
2. Inputs from local Canadean researchers are combined with an analysis of back data to create a longer range momentum forecast, weighted to the most recent period.
3. Our analysts then validate this forecast in a number of ways:
 - a. Ensuring forecasts are within the recent range of market/category change
 - b. Volume forecasts are aligned with forecast changes in GDP
 - c. Forecasts fit with data on industry confidence levels
4. Finally, we have made specific allowance for the effects of the recent global economic downturn, using an analysis of previous economic dips and their effect on beverage consumption.
